- Safe Drop Feature
- Tip Payout Management
- EMV and NFC

# Choosing the Right POS System

It's no wonder that the RiO is short for Retail in One. With a simple setup process, merchants will enjoy the ease of use right out of the box and have more time tending to their customers. Also, the intuitive interface trains your staff in minutes, allowing you to move the line faster.

Unlike other POS systems, the RiO is the only all-inclusive, turn-key unit on the market. Cash drawer, touchscreen, receipt printer, barcode scanner, and a powerful software program makes this a clear choice for almost any type of business.

**Like the RiO, we've cleared the clutter and kept it simple.**

**Customer Care.** Get your questions answered from Central Payment's first-class customer and technical support, available 24/7, 365 days.

**Best bang for your buck.** With simple and affordable pricing, it's easy to start using RiO in your business.

**Future-proof.** As technology evolves, the RiO will always be a step ahead of the game and keep you secure.
